Education

National Institute of Technology Andhra Pradesh

Aug. 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.75/10.0

Tadepalligudem, Andhra Pradesh

Relevant Coursework: Computer Networks, Database Management Systems, Operating Systems, Data Structures & Algorithms, Design & Analysis of Algorithms, Object Oriented Programming

Experience

Intants Pvt Ltd

May 2026 – July 2026

Software Engineer Intern

Remote

- Worked on an AI-based invoice processing platform covering purchase orders, goods receipts and vendors, building **Python/FastAPI** REST APIs, **React** screens and a **PostgreSQL** schema.
- Built invoice data extraction and an **authenticity check** that verifies each invoice against the database and other sources, so suspicious or duplicate invoices are flagged before they are processed.

National Institute of Technology Andhra Pradesh

Aug 2025 – Dec 2025

Back End Developer Intern

Tadepalligudem, Andhra Pradesh

- Built **REST APIs** for a question recommendation service that prioritises and tags questions using each student's profile and past performance.
- Wrote **Python (pandas, NumPy)** pipelines and dashboards that turn user activity into topic-level trends, and worked with the frontend team through **Git/GitHub**.

Indian Institute of Technology Ropar

May 2025 – Aug 2025

Research Intern

Ropar, Punjab

- Modelled large relational datasets as graphs and wrote processing logic to find relationships and dependencies that were not visible in the raw tables.
- Built the backend data processing behind an interactive web interface, with filtering and toggling so researchers could explore the data in real time.

Projects

BrainWave (EdTech Platform) | React, Node.js, Express.js, MongoDB, Razorpay

- Built a full-stack course platform with an instructor dashboard, a student catalog and a **MongoDB** data model.
- Secured it with **OTP-based signup**, **JWT authentication**, cookie sessions and **role-based access control** in server-side middleware, and integrated Razorpay for payments.

TalkCircle (Audio/Video Room Platform) | Node.js, React, WebRTC, AWS S3, FFmpeg

- Built a peer-to-peer room platform over **WebRTC** for low-latency audio and video, recording each user on their own device so the final output does not depend on call quality.
- Built a recording manager that uploads recordings to **AWS S3** in chunks through background jobs, then joins them with FFmpeg and emails the finished recording to the user.

MediLens (AI Medical Assistant) | Python, FastAPI, React, Gemini API, RAG, OCR

- Built an AI assistant with a **FastAPI** backend and **React** frontend that uses the **Gemini API** for symptom triage and to pick out medical terms from patient notes.
- Grounded answers in a local **PubMed** collection (RAG) instead of the model's memory, and added **OCR** to read prescription images.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++

Web & APIs: FastAPI, Django, Node.js, Express.js, REST APIs, React.js, WebRTC

Databases & Data: PostgreSQL, MongoDB, SQLite, pandas, NumPy

Security: JWT authentication, OTP verification, role-based access control, data validation

Cloud & Tools: AWS S3, Linux, Git/GitHub; LLM APIs, RAG, OCR

Achievements / Leadership

- Contest rating of **1570** on LeetCode; ranked in the **Top 1.6%** of JEE Mains (17,801 / 1.1M candidates).
- Led sponsorship outreach for Techkriya, raising INR 1 lakh through industry outreach and stakeholder presentations; won the Meritorious Idea Award from the Institute Innovation Council.
